PRE-QUALIFIED FOR Fire alarm system design

STATEMENT BY FIRM Guidepost Solutions provides innovative low voltage (security, fire life safety, audiovisual, and teldata) technology consulting, design, and management services that balance realistic business needs with industry-best, cost-effective solutions. Our team has successfully completed assessments for low voltage technology projects, internationally for hundreds of private sector clients and numerous museum, education, city, county, federal government, corporate and industrial facilities. In the course of delivering exceptionally responsive service to our most demanding clients, Guidepost Solutions has effectively interfaced with our clients' internal and external consultants, architects, and systems integrators. Our flexibility, high professionalism, and commitment to excellence have resulted in projects completed on time, on budget, in compliance with all governing codes and regulations, and fully coordinated with the activities of other contractors and subcontractors.
